

AI
styrene transparent resin composition according to any one of Claims 1 to 3, the method comprising melt-blending 10 to 95 parts by weight of copolymer (A) obtained by polymerizing a vinyl monomer mixture (a), and 90 to 5% by weight of graft copolymer (B) obtained by graft-polymerizing a vinyl monomer mixture (c) in the presence of emulsifier is contained in the graft copolymer (B).

12. (Amended) A method of producing a rubber-reinforced styrene transparent resin composition according to any one of Claims 1 to 3, wherein the copolymer (A) is obtained by continuous bulk polymerization or continuous solution polymerization of the vinyl monomer mixture (a), and the graft copolymer (B) is added to the obtained copolymer (A) in a melt state and melt-blended therewith.

AB
16. (Amended) A method of producing a rubber-reinforced styrene transparent resin composition according to Claim 13, wherein the graft copolymer (B) added to the copolymer (A) is in a semi-melt or melt state.

8/27/71

A4

18. (Amended) A method of producing a rubber-reinforced styrene transparent resin composition according to any one of Claims 1 to 3, wherein 0.1 to 5% by weight of water relative to the resin composition is added in the course of the step of melt-blending the copolymer (A) and the graft copolymer (B).
